

# Enhancing Project Estimation with WebGhat's Estimators

## Situation

### Client:

A global leader in commercial real estate and large-scale infrastructure development, specializing in sustainable and innovative architectural solutions.

### Challenge:

The client faced issues with inaccurate cost estimation for an upcoming project, leading to budget overruns and project delays.

### Outcome:

WebGhat's approach reduced estimation errors by 20%, resulting in on-time project delivery and improved budget control.

### Client Feedback:

"WebGhat's support has been crucial in streamlining our project estimation process. Their accurate costing and real-time tracking have significantly reduced budget overruns and ensured smooth project execution."

## Solution

### Site Analysis and Plan Review:

WebGhat conducted a thorough site analysis and reviewed the architectural plans to ensure all cost factors were considered.

### Accurate Cost Estimation:

Detailed quantity takeoffs were created for materials and labor using advanced estimation software, ensuring precise and reliable project costing.

### Real-Time Cost Tracking:

WebGhat implemented a real-time cost-tracking system to monitor budget adherence, helping the client stay on top of expenses throughout the project.
